

Those who work in the Human Resources field need a common foundation, knowledge and skills that enable them to

- \* assess the complex dilemmas facing individuals and groups in unique situations.

- \* act in ways that are effective and socially responsible

- \* consider options and possibilities for clients

Careers in this area include education, corrections, law, government, child development and national security.

Child Psychology- grades 9-12

Health, 2+2 LCC credit, or Elective

Discover what's really going on in a child's world by studying their physical, social/emotional, cognitive, and language development.

Students who complete a year of Child Psychology with a B or better receive 3 hour of college credit and fulfill one of the requirements for a Human Resources CAM.
